Details:

Season- Two types of season - Kharif and Rabi. These two will be populate in the drop down in page load.

Crop Name-There will be a master table for this. Every crop will be tagged to a season ID. When you will select any season from season drop down accordingly crop will bind.

Farmer Category : Three option buttons(Small , medium , large) . ---- Any one from these three

1. All are mandatory.
2. If One Aadhaar is registered for a particular crop, then Aadhaar duplicate found alert will show to user. (Ex: If the one aadhaar is tagged to Crop A already , then same Aadhaar will not be allowed for crop A again , but same aadhaar can be allowed for Crop B).
3. create one crop master and insert some data in backend.
4. After Submission, the page will be redirected to a View Page where the submitted data can be checked.
